About Dimou Design

Dimou Design is a fast developing company since 1992 and is specialized in the construction of based aluminium furniture facades. Dimou Design company pioneer in designing aluminium based based furniture systems and supports partners in the processing. We are located at a private property of 3000m² at the industrial park of Oreokastro Thesaslouiki.

We always use the finest quality in aluminium profiles for our products with a perfect finish, flawless anodizing, certified by Qualanod, able to be dyed electrostatically in all RAL colours and in all wood hues. Combining aluminium in perfect harmony with other materials like glass, artfial leather, digital printing we come up with pioneering and elegant solutions of a high design, and can adjust in any dimension for all areas.

Our work is orientated to client's best service and we partner only with the best suppliers. Quality of our products, delivery time and support are assumed to be our advantages, making us your first choice.

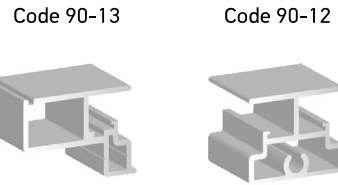

Sincerely,
Sotiris & Petros Dimou

Digital Printing

You can choose among a rich collection of themes or provide us your own picture or design. Digital Printing resolution is 1728 dpi and max dimensions 160 cm x 400 cm. Different quality resolution available (low & high quality) along with density - transparency levels (no1 - no2 - no3).

Variety of printing materials such as glass - silkscreened glass, lacquered surfaces, artificial leather, melamine, decoprint, bond inox, plexiglass or any other falt surface of a width between 2mm and 50mm.

We only use certified inks for our digital printings, ensuring air purity (non toxic) in the area, rendering our products suitable for use in child's rooms and schools.

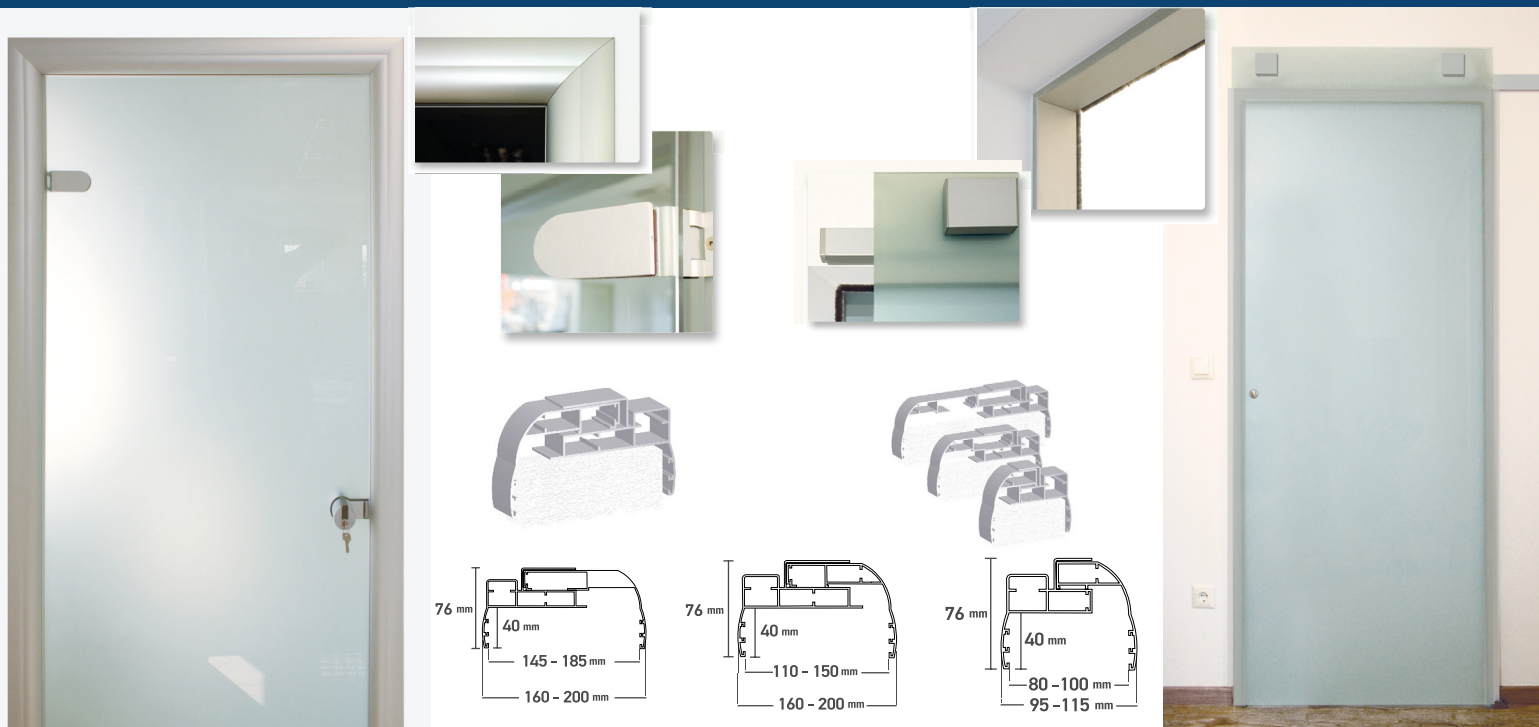

CNC SANDBLASTING

Our company uses an inovative application of high quality digital printings, and the unique in **Europe** CNC method of sandblasting, being able to transform any surface into a unique piece of art and incorporate it into your enviroment, adjusting accordingly the scene.
